To whom it may concern:As a music lover and avid listener of radio - XM radio is a breath of fresh air in an industry that is wrought with commercialism. I do not enjoy listening to standard braodcast radio because the DJs are obnoxious and the playlists are too repetitive. I can listen to one genre of music from coast to coast without interruption. I don't get static when the signal is weak and I don't have to listen to the restricted fare that commercial record companies try to force on you. The addition of traffic and weather wherever and whenever I need it is a benefit that should not be restricted. Times are constantly changing and the NAB should not be using politicians to restrict access to new and better technologies and services.
